

TEMPLAR
RAPID RESPONSE

DISTRIBUTED ARMORY
EVERY SECOND
COUNTS.

Protect your organization from harm with the Templar Distributed Armory solution to Deter, Defend, Defeat, and Triage. Avoid having to ask yourself if you could have done more.

Safe Environment

All the advantages of an armed security staff with none of the liabilities associated with armed guards.

Comprehensive Vault

Each Distributed Armory Vault contains ballistic vests, Trauma Aid Kits, non-lethal/lethal deterrents, and more to help you address the threat and save lives quickly.

Secure

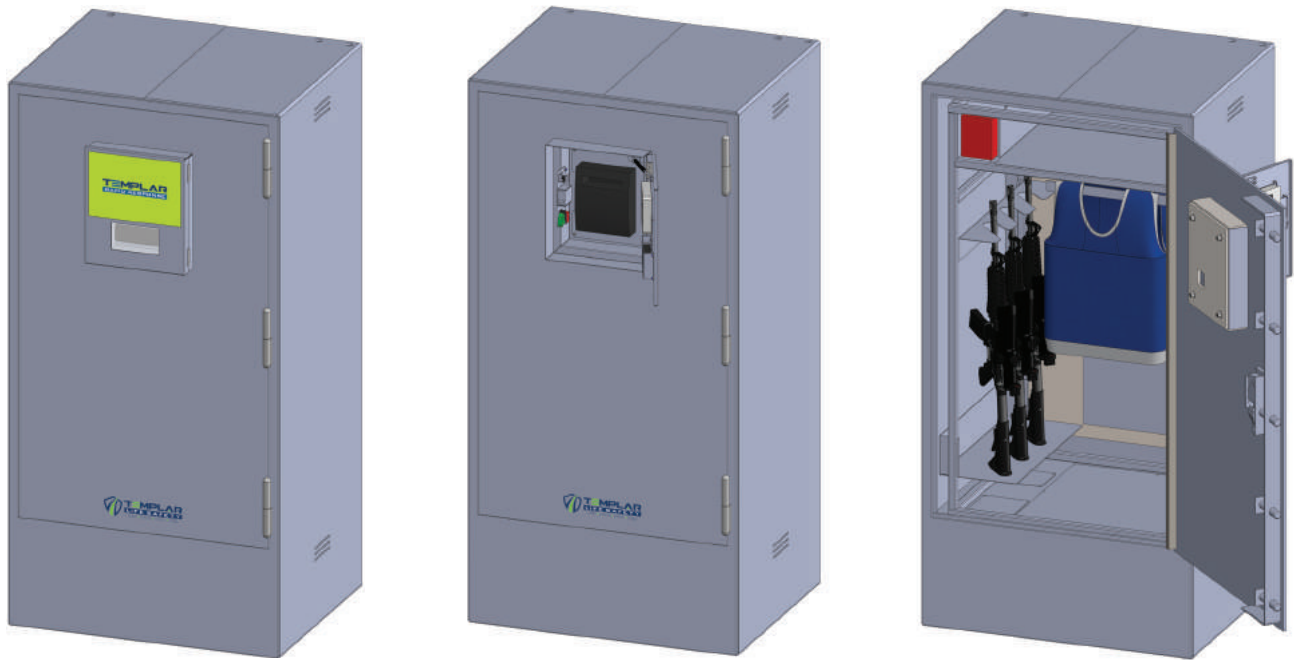

Purpose built with steel plate construction, each vault has multi-factor authentication access and can be integrated into your existing alarm system.

Training

Templar Training can train your staff or your security company personnel on how to effectively use the vault and the security tools inside.

Distributed Armory

The Templar Distributed Armory Vault offers immediate access to the critical security tools needed to deter, defend, defeat, and triage during an Active Shooter or Assailant Attack. The vault is purpose built with steel plate construction, multi-factor authentication access, and tamper proof security. Only trained and authorized personnel will be able to utilize the vault and its contents to defend the facility and save lives. You can have arms rapidly available for your guards without having to carry them. Ideal for those corporations who wish to maintain a given corporate culture.
