

TEMPLAR
RAPID RESPONSE

RAPID RESPONSE SYSTEM EVERY SECOND COUNTS.

On average, first responders take 8-12 minutes to arrive on-site. Take charge with the Rapid Response System™ to reduce response time and save lives during an Active Shooter Event.

Save Lives

Templar's Rapid Response System™ saves lives three ways: deterring events from happening – providing a rapid response – and the training to triage the wounded.

Save Money

Minimize the financial impact suffered as a result of an attack from a disgruntled employee/customer or active shooter. Our RRS can cost much less than the losses incurred.

Reduced Response Time

Reduces response time in Active Shooter Events or assailant attacks by responding with on-site personnel who have been thoroughly vetted and trained by Templar.

Reduce Liability

Templar's Rapid Response System™ will reduce risk and thereby reduce liability. The RRS helps you comply with OSHA requirements and can reduce insurance premiums.

Rapid Response System™

The Templar Rapid Response System™ integrates hardware, software, and training to provide the tools needed to effectively address an Active Shooter Event or emergency before first responders arrive. The system can be easily integrated into academic, house of worship, and other large facilities at a fraction of the cost of traditional security solutions.

FEATURES

- Deterrent Effect
- Ongoing Personnel Vetting Process
- Comprehensive Training Program
- Templar Vault
- Ongoing Service and Support

The Templar Vault offers immediate access to the tools needed to Deter, Defend, Defeat, and Triage during an Active Shooter or Assailant Event. Only trained and authorized personnel can access the vault and its contents to defend the facility and save lives.

FEATURES
